

An example “Deep” Neural Network

Example of a deep neural net architecture.

Value of Deep Neural Networks

- Deep Learning learns a **hierarchy of non-linear transformations**
- Neurons transform their input in a non-linear way
- **Black-box, brute-force method, really good at pattern recognition**
- Deep Learning got a boost in the last decade due to **faster hardware and algorithmic advances**

Deep Learning model
=
set of connecting weights
+
type of non-linearity

An example “Deep” Neural Network
