

Casestudy: Lending Club Dataset

	Column Name	Description	Unit	Role
1	loan_amnt	Requested loan amount	US dollars	Predictor
2	term	Longest term length	Months	Predictor
3	int_term	Recommended interest rate	Rate	Response
4	emp_length	Employment length	Years	Predictor
5	home_ownership	Housing status	Categorical	Predictor
6	annual_inc	Annual income	US dollars	Predictor
7	purpose	Purpose for the loan	Categorical	Predictor
8	addr_state	State of residence	Categorical	Predictor
9	dti	Debt to income ratio	Percent	Predictor
10	delinq_2yrs	Number of delinquencies in the past 2 years	Count	Predictor
11	revol_util	Revolving credit line utilized	Percent	Predictor
12	total_acc	Number of active accounts	Count	Predictor
13	bad_loan	Bad loan indicator	Boolean	Response
14	longest_credit_length	Age of oldest active account	Years	Predictor
15	verification_status	Income verification status	Boolean	Predictor
