

Ensemble Trees

13

IN (X)

$$j = f(x; x_1, \dots, x_n)$$

Regularization: Observation and Feature Sampling

- For each tree, select from P features (columns) and N rows

$$\mathcal{P} \in \{1, 2, \dots, P\}$$

$$\mathcal{N} \in \{1, 2, \dots, N\}$$

$$\mathcal{P}^{[i]} \subseteq \mathcal{P}, |\mathcal{P}^{[i]}| = P^{[i]} = \gamma_{\text{COL}} P$$

$$\mathcal{N}^{[i]} \subseteq \mathcal{N}, |\mathcal{N}^{[i]}| = N^{[i]} = \gamma_{\text{ROW}} N$$
